

LS PMS

Performance Management System — a screen-by-screen tour of the prototype · 7 October 2026

The prototype runs on the real organisation: 109 active employees, their actual reporting lines and their live project allocations. Nothing in it is mocked except the sample ratings, which are clearly labelled.

It is a single self-contained HTML file. Open it in any browser — no account, no install, no internet needed.

WHAT IT FIXES

- **Nothing accumulated.** Performance was assessed once a year, from memory. Now it is recorded monthly and scored quarterly.
 - **No evidence requirement.** A written example was needed at 5 but not at 4, so 4 became free. In FY26, 42 of 73 people landed on 4 or 5.
 - **Nothing objective.** Every input was opinion typed into a form. Project allocation now sits beside the rating as factual context.
-

HOW TO DRIVE IT

- Switch role from the top right — **Employee, Manager, HR.**
- Within each role, the tab strip switches between **monthly, quarterly** and **annual.**
- Change quarter from the top left. FY27-Q3 is the live one; Q1 is closed.
- In the HR view, **Load sample data** populates ratings so the dashboards come alive.

Monthly record

Three months, each with its own state. Only months inside an open quarter accept input, and both the employee and the manager write into the same month, each entry stamped with the date it was recorded.

My year

Monthly record

Submitted month by month. Optional for you, expected of your manager.

October 2026

OPEN

Employee. No entry.

Manager. No entry.

What they did · What you noticed · Anything to flag

Shipped the Leap payments screen. Picked up the API work without being asked. Still slow to raise blockers.

November 2026

NOT STARTED

Employee. No entry.

Manager. No entry.

Not open yet.

December 2026

NOT STARTED

Employee. No entry.

Manager. No entry.

Not open yet.

Months stay editable for as long as the quarter is open — a missed October line can be added in December. The cycle administrator closes the quarter, and from that point the record is fixed. That is what stops July being written in March.

- The prompt is deliberate — *what they did · what you noticed · anything to flag*. A blank box gets “worked on Leap”.
- Optional for the employee, expected of the manager.
- A month stays editable for as long as its quarter is open, so a missed October line can be added in December.

LS PMS · PROTOTYPE WALKTHROUGH · OCT 2026

2

Quarterly self-assessment

Six competencies, scored 1 to 5. Two carry double weight — Delivery & Accountability and Technical / Functional Skill — so the divisor is 8, not 6.

Monthly record Quarterly review My year

Your quarter

What did you work on, and what did you deliver?

What got in the way?

Competency self-assessment

1 Unsatisfactory - 2 Needs Improvement - 3 Meets Expectations - 4 Exceeds Expectations - 5 Outstanding. An example is required at 4 or 5 — in FY26 only a 5 needed one, which is why 42 of 73 people landed on 4 or 5. Delivery & Accountability and Technical / Functional Skill carry double weight.

Delivery & Accountability - primary

Delivers what was agreed, on the timeline agreed. Owns the outcome. Raises problems early rather than at the deadline.

1 2 3 4 5

A written example is required at 4. Name the project, the deliverable and roughly when.

e.g. Led the Power Origin payments cutover in August; zero rollback.

Technical / Functional Skill - primary

Code, design and tooling in their stack; depth appropriate to grade.

1 2 3 4 5

A written example is required at 4. Name the project, the deliverable and roughly when.

e.g. Led the Power Origin payments cutover in August; zero rollback.

Quality of Work

Defects reaching QA or production, rework, incidents traced to their work.

1 2 3 4 5

Problem Solving & Judgement

Breaks a problem down, chooses a sensible path, knows when to decide and when to escalate.

1 2 3 4 5

A written example is required at 4. Name the project, the deliverable and roughly when.

e.g. Led the Power Origin payments cutover in August; zero rollback.

Communication & Collaboration

Clear in writing and in person, with the team and outward to clients. Works well with people unlike them.

1 2 3 4 5

- A written example is mandatory at 4 and 5, naming the project, the deliverable and roughly when.
- The self-rating is recorded but never enters the score. It exists to surface the gap in the conversation.
- Technical / Functional Skill and Quality of Work show a different description depending on the person's function.

The team

Everyone the manager is entitled to rate, assembled from reporting lines rather than a static list. The Gap column flags anyone whose self-rating is a point or more away from the manager's.

Rajan Kumar Das EB931	DevOps Engineer	0/3	3.25	3.50	-0.25	MANAGER DONE

- Monthly lines shows how much of the quarter was actually recorded — 0 of 3 is a warning sign before any rating is given.
- Status moves Not started → Self done → Manager done → Closed.

Monthly notes

The whole team on one screen, one box each, for the open month. This is the only thing expected of a manager monthly, and it is what makes the quarterly rating defensible.

Yadvinder Singh	PENDING
What they did - What you noticed - Anything to flag	
Prashant Kumar	RECORDED
Sample monthly note.	

- Twenty-five managers writing a few lines a month is the cheapest habit in the system and the highest-value one.
- Twelve dated lines a year beats four quarterly scores written from memory.

The review

Evidence first, judgement second. Allocation context from Edge sits at the top, the monthly record below it, then the ratings.

Months stay editable for as long as the quarter is open — a missed October line can be added in December. The cycle administrator closes the quarter, and from that point the record is fixed. That is what stops July being written in March.

What they said

Delivered. —

Got in the way. —

Your rating

Delivery & Accountability - primary
Delivers what was agreed, on the timeline agreed. Owns the outcome. Raises problems early rather than at the deadline.

- Allocation is not a rating — but scoring someone 2 on delivery when they were on bench for three months is a different conversation.
- Other project leads get a comment box. In V1 they comment; they do not score.
- The self-rating sits beside each competency as the manager scores it.

Before the conversation

The gap between what the person thinks and what the manager thinks, competency by competency, shown *before* the 1:1 rather than discovered during it.

Quarterly rating 3.50 Submit rating

Before you have the conversation

Self 3.25 against your 3.50 — a gap of -0.25. Close enough that the conversation should be straightforward.

COMPETENCY	SELF	YOU	GAP
Delivery & Accountability · primary	3	5	-2
Technical / Functional Skill · primary	3	2	+1
Quality of Work	4	3	+1
Problem Solving & Judgement	3	4	-1
Communication & Collaboration	3	5	-2
Learning & Growth	4	2	+2

The conversation

Not complete until the 1:1 has happened and the conclusion is recorded.

- A gap of 1.00 or more raises an alert telling the manager to open with evidence, not with the number.
- This is the commonest way a review goes wrong, and it was invisible in every previous cycle.

Annual roll-up

Four quarters, the trend between them, the average and the rounded number that feeds the existing rating × grade increment matrix.

Annual roll-up

Pick anyone to see how their four quarters become one number.

Arpan Mishra · Engineering and Technology

Arpan Mishra — FY27 roll-up

Every quarter, how it was produced, and what it averages to. This is the audit trail FY26 did not have.

FY27-Q1 · Apr-Jun 26

FY27-Q2 · Jul-Sep 26

3.50
FY27-Q3 · Oct-Dec 26

FY27-Q4 · Jan-Mar 27

3.50
Annual average of 1 quarter

FY27-Q3 3.50

+ 1 = 3.50

rounded for the appraisal matrix = 4

Feeds the appraisal matrix as a 4. The existing rating × grade grid turns that into an increment percentage for Grade 6. Any manual override of this number must carry a written reason — the unrecorded override was the FY26 failure point.

Whole organisation

PERSON	DEPARTMENT	Q1	Q2	Q3	Q4	ANNUAL
Rohit Goel	Sales & Marketing	—	—	3.50	—	3.50
Kamakshi .	Sales & Marketing	—	—	4.00	—	4.00
Arpan Mishra	Engineering and Technology	—	—	3.50	—	3.50
Shraddha Waghmare	Sales & Marketing	—	3.50	3.00	—	3.25
Manish Bidare	Engineering and Technology	—	—	—	—	—
Gaurav Pall	Engineering and Technology	—	—	—	—	—
Ram Prakash Varanasi	Engineering and Technology	—	—	—	—	—
Jakkam Deep Kumar	Engineering and Technology	—	—	—	—	—
Lateesh Sharma	Finance and Legal	—	—	—	—	—
Anshika Gupta	Human Resources & Admin	—	3.00	3.50	—	3.25
Ajay Sharma	Sales & Marketing	—	—	—	—	—
Pupesh Arora	IT & Hardware	—	4.00	3.50	—	3.75
Vishwajeet .	IT & Hardware	—	3.50	3.00	—	3.25
Suraj Raghu Kumar	Engineering and Technology	—	—	—	—	—
Anshul Sharma	Sales & Marketing	—	—	—	—	—
Gurjeet Saini	Engineering and Technology	3.50	3.00	3.50	—	3.33
Kumar Gaurav	Engineering and Technology	4.00	3.50	3.00	—	3.50

- Equal weighting across quarters actually rated. A quarter marked Not applicable is excluded rather than counted as weak.
- The arithmetic is shown, not hidden. Any manual override has to carry a written reason.
- The employee sees their own; the manager sees the team; HR sees everyone.

Cycle status

Completion across all 109, the rating distribution, and the per-manager averages that stand in for calibration in V1.

- The distribution carries the FY26 benchmark — 42 of 73 at 4 or 5. If the new shape matches, the evidence rule is not biting.
- Per-manager averages flag anyone above 4.20 or below 2.80. Twenty-five managers rating on twenty-five private scales is how FY26 ended up normalising centrality.
- Quarter control — opening and closing — sits with the cycle administrator.

Needs attention

Who is flagged, and who is holding the cycle up.

- Low-rating trigger: a quarter below 2.50, or two consecutive quarters below 3.00.
- Each flag requires a performance note within 7 days, countersigned by the HR head.
- A low rating with no monthly notes behind it should be challenged, not actioned.

NEXT

- Three data blockers clear before a build starts — see the scope document.
- Build target is Edge, which already holds all 112 people with roles and the project allocations.
- Where this walkthrough and the prototype disagree, the prototype is right. The rules are written into its code.
